

Dr. David Peralta is Editor-in-Chief for Wiley-VCH/Chemistry Europe and he will speak about AI Tools For Scientific Writing and Publishing: Best Practices and Ethical Implications.

He'll focus on AI and publishing. Using ChatGPT and a few new AI researcher tools as concrete examples, we'll uncover their pros and cons and present a way for anyone to evaluate if any AI tool they encounter is useful, legal, and ethical. We'll also have a broader look at how AI is changing the world of scientific publishing and its ethical implications in day-to-day research.
